To whom it may concern,

**SATMAR Satellite Communication & IT Services recommendation**

AST have continually utilised the professional services offered by Satmar, due to their proficiency, diligence and expertise to deploy what can often be very complex installations and commissions.

We have found Satmar to go above and beyond their duty because the main value they commit to is ensuring our clients are satisfied, despite what hurdles or complexities are put in front of them. Open communication and the willingness to go the extra mile has countless times proved beneficial in ensuring VSAT systems are fully operational and vessels can stick to itineraries without any loss of service.

I would sincerely recommend Satmar's dedicated team to provide technical solutions to whoever may need them, I can assure you that you will be in safe hands.

Yours sincerely

**Graham Perrin**  
**Operations & Project Manager**
